

1st Grade
G/T
How to
Stories!!!

Introduction

First grade G/T students decided to be "little teachers" this month. Each one chose something they were going to teach someone (maybe it will be you, the reader) about something they know how to do very well. It is their hope it will help you if you are interested

How to Color An
Elephant
Kelbie Pyburn

One day I decided to teach my three-year-old brother how to color an elephant. The first thing I did was to draw an elephant. Then I showed my brother how to color on a piece of scrap paper. Then I found a gray Crayola and gave it to my brother and told him to color the elephant. I tried to make sure he understood to stay in the lines so he could tell it was an elephant. He was proud of his work.

How to do the Monkey
Bars

Mikayla Licea Grade 1

I will enjoy teaching someone how to do the Monkey Bars. First, you have to have some Monkey Bars. Then when you are ready, I will show you how I do them. Then, when you think you can try to do it by yourself grab hold of a bar. With the other hand grab the next bar. Do the same thing again and again and if you can hold on, you know how to do it. See, it didn't take long to learn, did it? Now if you fall, just get up, dust yourself off and try again. You will love it.

How to Draw a
Dinosaur

Eric Constancia Grade 1

I am going to tell you how to draw a dinosaur. First you need to get a pencil you draw a body by drawing an oval. Then you draw another oval. That will be the head. This oval will be smaller. As you know the mouth of a dinosaur has big teeth. So draw the teeth. Then you draw one set of feet. These will be the front feet. Then you draw another set feet. That will be the hind legs. I hope this lesson in drawing a dinosaur will help you.

How to fly A Kite

Allie Campbell Grade 1

I am going to teach you how to fly a kite. You need to know all the steps:

Step #1- you need to know to buy or make a kite

Step # 2- need to know how to keep your kite down low and in control until you are ready to fly

Step # 3 you need a windy day to fly your kite- not too much or too little

Step #4- Let the string our little by little until the kite has lifted off the ground

Step#5-You will know how to keep your kite away from trees

Step # 6 you need to know to keep your kite away from wires.

I hope you have a good time and will stay safe flying kites.

How to Grow A Plant

Jazmin Juarez Grade 1

The first thing you should have is dirt that has been prepared for planting. You will need a shovel and some seed and a water hose. First you have to have a little furrow that you make with the shovel. Then you put the seed down into the furrow and you cover up the seed with a small amount of dirt. After planting, you need to water it a little, not a whole lot. Every day you should keep watering it until the plant pops out of the ground. You still

have to take good care of it until its stem is very strong, Then you have to look at it every day to see if it needs more water.

Finally, one day you look outside and you see you have some tiny watermelon on your plant.

How to Ride a Horse

Skylee Seth grade 1

First you need to have a horse. Second you need to have an adult with you. Third you need to put a bridle on the horse. Fourth, you need to put a saddle on the horse. Let the adult to this for you.

When you get on the horse, grab the horn and pull yourself up on the horse and in the saddle. When you are in the saddle, you will put one foot in one stirrup and the other foot in the other stirrup. Now you have to get the horse moving. He will need a gentle kick. He will get going. Once you have done all of this, that's all there is to it.

When you get back from the ride, take the saddle off the horse, give him a drink and some hay to eat. You will have fun I know.

How to Ride a Scooter

Zeph Christian Grade 1

To ride a scooter you hold on to the handle. If you are going fast then you step on the brake. The brake is at the back. To turn, lean

toward one side or the other. You will need to put one foot on the scooter one on the ground. You push the foot that's on the ground. You can balance by making sure your wheels are safe and in the correct position.

Once you get the hang of it, it will be lots of fun. Remember, you may have some spills. But you just have to try again.

How to tell Time

Madison Vandaventer
Grade 1

I am going to teach someone to tell time and they will learn I think. First I have to have a clock. Next I have to plan to tell them about the big hand and the little hand. Did you know that there are the numbers 1-12 on a clock? There are five minutes between each number. You have to learn to count by 5s when you tell time. When the little hand is on a number that is the hour. When the little hand is on a number that tells the minutes. Now do you think you know how to tell time?
