Cats and Dogs. I've had both. Both have to be fed, played with, brushed, groomed, bathed, and taken out. But, cats go in a disgusting litter box that you have to clean! Dogs you don't have to. Dogs comfort you and cats scratch you to death. Dogs fetch; cats roll a ball of string around. Cats make people sneeze and they shed twenty four seven. Dogs shed after the cold. Cats eat mice; dogs catch them they just don't eat them. Cats can't be taught to do tricks dogs can! Cats can't swim; dogs can. Cats don't protect you, dogs do. So as you can tell dogs win with me at least.

## Guitars and Drums to Rock the World

Ian Stark 5<sup>th</sup>

I can play drums and I can play guitar. I rock on both of them. But guitar is definitely harder to learn. Drums keep the rhythm...no they SET the rhythm for the entire song! But guitar does the main music. Guitar is hard to learn, and I

should know. My dad taught me how to play drums and guitar. He also gave me a book on guitars. It has been useful for practicing. Anyway, my point is that if you are interested in learning guitar or drum ask your mom or dad or any relative to teach you if they know how. Prepare to practice, practice, practice! Now I know that many people play Guitar Hero games. However, they do not teach you anything and are much easier than normal guitar. Have fun! By the way, do not play after 10:00 in Comanche. You are not supposed to play after 10:00, and you can get fined. Now I have but two words for you. ROCK ON!

## The Planet

Jazzy Matlock 5<sup>th</sup>

When I think about the earth, I think about clean air, singing birds, and clear water. Well, I'm wrong; the earth has polluted air, endangered animals, and dirty brown water. We can change all of this in the little things we do every day. If we turn off all of our lights when we are not in a room and don't leave the water running when doing the dishes. Earth is the only planet in all of the nine planets in our

solar system that can sustains life and we take advantage of it. We won't be around forever you know. Our natural resources are running out slowly but surely. The northern polar ice caps are melting, and the polar bears are dying and their population is decreasing. The earth will flood if they melt completely. We better do something about our planet, or we all better learn how to swim like fish and breathe underwater!!! The Earth is dying! **S.O.P (Save Our Planet)**
